

# WFPI Pediatric Radiology Observership - Serbia

## Introduction:

WFPI is offering financial support (US \$3,000 total) towards travel and accommodation expenses for a qualified radiologist to participate in an unpaid observership position of up to 3 months in Serbia. The observership will be spent at the Radiology Department of the Institute for Children and Adolescents Health Care of Vojvodina, Novi Sad, Serbia under the mentorship of Jovan Lovrenski, MD, PhD, Full Professor of Radiology at the Faculty of Medicine, University of Novi Sad, Serbia, along with the team of 10 more radiologists of the Institute dealing exclusively with pediatric population, including Full Prof. Katarina Koprivšek, one of the leading pediatric neuroradiologists in Eastern Europe.

This program offers US \$3,000 US to help cover transport and living expenses.

The program aims to enhance the clinical practice and teaching of paediatric radiology at all levels of healthcare more broadly by developing expertise in imaging techniques and familiarity with protocols appropriate to the region's burden of childhood disease. The program is designed to complement and expand basic specialist training in diagnostic radiology. The outcome will be detailed knowledge and in-depth experience of paediatric imaging in the context of the region's unique disease burden. The knowledge and skills acquired will empower a radiologist to conduct optimal paediatric imaging in either a general radiology service or a dedicated paediatric service.
